Job Application

Dear Mr./Ms./Dr.,

I'm currently working as Senior Backend Engineer(Remote) at ColorElephant. Although, my profile is of backend work, I enjoy working on Vue, Tailwind CSS, Amazon Alexa and IOT frameworks, which gives me joy. My major work at ColorElephant is to integrate and maintain new payment options/methods on one of the multi-million dollar e-commerce fashion site for 150+ countries. Which includes, PayPal, Stripe, AmazonPay, ApplePay, PayuOS, Axerve, BitPay and few other country specifics.

Besides full-time work, I'm open source enthusiast where I maintain and develop some great Vue and Laravel libraries. Also by profession I'm a developer but by passion I a hardcore rider and this passion stimulated an idea to build a application for riders community which I'm currently working on as a side project (<https://myriderhood.com>).

I feel socially responsible person and in this COVID-19 pandemic situation, I developed an application in free time to voluntarily help the state administration. Where, any family in panic situation can request help from nearby locality or anyone willing to help can post their help on the platform(<https://madat-app.in>).

I would appreciate the opportunity to discuss the position and your needs for this role. Please contact me at your convenience and let me know how I can help you.

Sincerely,

Vaibhavraj Roham
